PROFESSIONAL SUMMARY

Front-End Developer with a keen eye for detail and expertise in React and JavaScript. Skilled in building responsive, optimized web applications using modern front-end technologies, ensuring seamless user experiences and efficient performance.

WORK EXPERIENCE & INTERS

Web page development ∞

November 2021 – February 2022

Internship at Egyptian Ministry of Communications and Information Technology

Online

- Built responsive web pages using HTML, CSS, and JavaScript, improving user interface accessibility.
- Collaborated with a team to implement UI components, reducing development time by 10%.

PROJECTS

Flora | React, React Router, Bootstrap

[Flora-Shop](#) | [GitHub](#)

- Developed a responsive single-page application using React.js, leveraging JavaScript, JSX, and modern UI/UX principles.
- Utilized Webpack, Babel, and Git to streamline development and deployment, optimizing bundle size and load performance.

Pixel Quest: Arcade Adventure – A JavaScript OOP-Powered Browser Game

[Game-OOP](#) | [GitHub](#)

- Built a browser-based game using object-oriented JavaScript, demonstrating modular code and interactive design.
- Implemented responsive game mechanics, enhancing user engagement and cross-device compatibility.

Weather Now: Real-Time Forecast Web App

[Weather.io](#) | [GitHub](#)

- Created a responsive web app integrated with the Open Weather Map API to deliver real-time weather updates.
- Designed a user-friendly interface, ensuring accessibility and visually appealing layouts across devices.

Facebook-Inspired Login System

[Fake-Facebook](#) | [GitHub](#)

- Developed a web app simulating a Facebook-style login/signup interface, focusing on front-end development and UI design.
- Enhanced the sign-in/signup experience for responsiveness and user engagement.
